

CAPABILITY STATEMENT

FOUNDED IN 2007, THINK STUDIOS IS A SMALL CREATIVE DESIGN TEAM BASED IN PERTH THAT PROVIDES THE RIGHT COMMUNICATION TOOLS TO MAXIMISE CLIENT'S BUSINESS IMPACT ACROSS ANY INDUSTRY

A WEBSITE FOR ANY BUSINESS

With over six years of Wordpress experience under our belt and a portfolio of more than forty websites, we know how to leverage its potential to exceed our customer's requirements. Each member of our team is capable at utilising this CMS system to its full ability. From small, simple and effective to large, complex and functional, we make sure all the needs are understood and tailor the website to those needs.

Catering to all business sizes, we take an interactive approach in all stages, from understanding the client's corporate culture to delivering the final product, ensuring all of the boxes are ticked at each step of the way. Being a small company ourselves, we know what it means to take care of the little things, because in the end it's these little things that make up the soul of the company. We love to embrace creativity and will push the boundaries of what's achievable and find ways of nailing new processes.

OUR PROCESS

Engage We sit down with the client in order to gain a full understanding of the scope of work, get a feel for the personality of the company and start to build a strong relationship from where future endeavours can be realised.

Refine Before we take anything online, we provide our client with a working website in the development environment. With feedback from the client, the project is fine tuned and adjusted to produce a final product.

Brief Based on the relevant information, we develop a plan that acts as the backbone of the website building process. This gives our customers confidence in our work and the final product that they will receive.

Deliver Upon delivery of the website, we take the time to provide training to our customers so they can update their website at any time.

Develop We then put our plan into action. During development we go through rigorous bug and security testing, because a website should function as good as it looks. We ensure that our websites will endure the test of time.

Analyse We will analyse the impact that your website has had, whether it's tracking statistics, an email campaign, or a re-brand solution.

Support Most importantly, we are always available to help with any problems that may arise after delivery and more than happy to take on any other projects in the future.

KEY CAPABILITIES

Our advantage is that all our skills are in-house, meaning we can do it all ourselves to give a product on time, every time. Our skills include:

- Website Design
- E-Commerce
- Graphic Design (Digital & Print)
- Social Media Marketing & Integration
- Brand Development
- Print Management
- E-Marketing
- Photography
- Videography
- Animation
- Illustration

TESTIMONIALS

“ Both Chris and Simon were extremely helpful and patient throughout our experience with them, so much so that I am now embarking on my second project with them. I am happy to recommend their professional services to anyone looking to build a new website. ”

Jocelyn Derecourt
Spa Proprietor
Cove Spa

“ Our experience with Think Studios has been exceptional. After a poor experience with another website designer, we found the ideas for our website design and logo re-fresh from Think Studios were original, creative and “on brief”. A total breath of fresh air! We would definitely recommend Think Studios for any type of work that involved website design, re-branding and associated stationery design. Many thanks to Simon and Team. ”

Erryn Dimond
Associate
Dimond Family Lawyers

“ I have worked closely with Simon Claire and Chris over a number of years as a client of think studios. Their creativity, insight, professionalism and customer focus are exemplary. It is always a great experience working with them and I would not hesitate to recommend ‘think’ to those seeking a motivated digital design business. ”

Russell Springham
Russell Springham Brand and Communications
